## PRESS RELEASE

### FOR IMMEDIATE RELEASE

*North Kingstown, RI—November 1, 2012*—The BioProcess Institute (BPI) is excited to introduce a first-of-its-kind: **BIOPROCESS PERFORMANCE REPORTS**. These reports contain a collection of valuable information to help bioprocess end-users make highly informed choices when selecting bioprocessing components. The first reports will focus on hygienic gaskets and diaphragm valve diaphragms. The BioProcess Institute has assessed component performance in accordance with current industry requirements and accepted performance tests. They have also analyzed acceptance criteria to determine if the components meet requirements for pressure, dimensional tolerances, service life and cleanability.

**BIOPROCESS PERFORMANCE REPORTS** break down all the information needed and present it in an organized, complete and logical format in order to assist you in your search for the right diaphragm for a specific application, offer technical support for your investigation, or provide justification for your change control.

Future **BIOPROCESS PERFORMANCE REPORTS** will focus on other important bioprocessing components for both multi-use and single-use applications.

The BioProcess Institute developed **BIOPROCESS PERFORMANCE REPORTS** as part of their continuing effort to be your expert navigator for the complex world of bioprocessing. For pricing, discounts, and additional information, please visit [www.bioprocessinstitute.com](http://www.bioprocessinstitute.com).
